

Supplementary Figure S1. FinnGen R13 phenotype-wide associations of
MUTYH p.Gly155Asp (rs587781864) across cancer phenotypes

* $-\log_{10}P \geq 3.45$ (C3_GBM primary signal). FinnGen R13: N=467 GBM cases, 372,626 total. Does not pass genome-wide Bonferroni (>4.98); replication-grade lead. MUTYH p.Gly155Asp: ClinVar Pathogenic/Likely-pathogenic for MAP (VCV000141595); gnomAD FIN enrichment 7.3x vs NFE; monoallelic carriers.
